self-driving cars

BENEFITS

- Reduce accidents and congestion
- Cars would not be impaired or distracted
- Humans can use commute time for other tasks
- No parking hassles
- Increased independent mobility for the elderly, blind, and people with other disabilities

DRAWBACKS

- Accidents can still happen (e.g. due to technical failures)
- In the event of a crash, it is not clear who is liable
- Elimination of jobs such as taxi and truck drivers
- More expensive than traditional cars
- Loss of privacy. The cars track and record everywhere you go
